

Quagga – question answering over graphs

Join our effort in collecting question/query pairs for existing Knowledge Graphs available via SPARQL. Known as Knowledge Graphs Question Answering (KGQA), this task is crucial in making KGs more accessible to non-experts.

Our first milestone is to reach 200 question/query pairs. Here is a summary of the data we collected as of August 23, 2025.

Question/Query pairs	Knowledge Graphs	Contributors

Start by selecting a knowledge graph

Select

▼

Don't find a fit? [Add a new knowledge graph](#)

Add your question in natural language:

Example: What are the universitites in Italy?

Add the SPARQL Query (optional):

Example: SELECT ?university WHERE (?university a dbo:University . ?university dbo:country dbr:Germany.)

Note: You can modify the SPARQL query later from the submissions page.

VALIDATE SPARQL

Source URL (optional):

URL from which the query comes from

Start by selecting a knowledge graph

Select

Custom Knowledge Graph Details

Choose a name:

e.g. My custom KG

Insert About page URL:

e.g. <https://example.org/about>

Select up to 3 discipline keywords:

ARCHEOLOGY & PREHISTORY

ARCHITECTURE & SPACE MANAGEMENT

ART & ART HISTORY

ECONOMIES & FINANCE

EDUCATION

HISTORY

LAW

LINGUISTICS

LITERATURE

CULTURAL HERITAGE & MUSEOLOGY

MUSICOLOGY & PERFORMING ARTS

PHILOSOPHY

PSYCHOLOGY

RELIGIONS

SOCIOLOGY

Enter Description (max. 100 words):

e.g. <https://example.org/about>

IUnsert Knowledge graph querying URL/data dump URL:

e.g. <https://example.org/sparql>

 This is a data dump URL (not a SPARQL endpoint)

VALIDATE KG

▲ PLEASE ENTER AN ENDPOINT URL FIRST

Add your question in natural language:

What are the universities in Italy?

Frequently Asked Questions

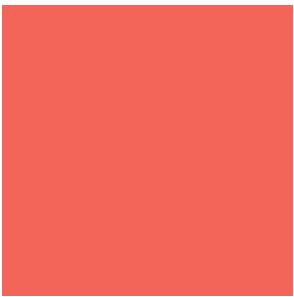

What does the app do?

How do I contribute to the project?

What kind of knowledge graphs are supported?

The platform supports knowledge graphs in the social sciences and humanities domain. You can browse existing submissions to see which endpoints are currently being used, or you can add new endpoints by providing the SPARQL endpoint URL along with a name and description for the knowledge graph.

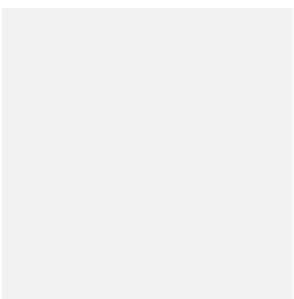

Can I modify my submissions?
